

9.0 Plant Species Found on Soil Associations

Using the species lists

The catchments in the Perth region have been subject to great pressures from urban and agricultural development and expansion. As a result, valuable vegetation communities have been degraded or cleared for new land uses. Increasingly, there is a need to rehabilitate these catchment areas to improve water quality, waterways environments and bushland communities. In addition, urban environments can benefit from planting of native species in parklands, gardens and roadsides.

The Swan River Trust has compiled the tables of common species found on various soil associations shown in Figure 2. The tables have been compiled from the sources listed at the end of this section. The tables are not intended to be a comprehensive species list rather they are a guide to the types of plants associated with the soils. They can be used to compile suitable planting programs to maintain and improve natural vegetation communities or to revegetate cleared areas.

Benefits of Implementing an Endemic Planting Program

- Maintaining areas of ecological significance and providing conservation corridors.
- Continuing biodiversity and species evolution.
- Limits soil erosion - direct runoff into revegetated areas.
- High stream control, moderate stream bank erosion control and low peak discharge control.
- Moderate to high ground water recharge capability.
- High habitat creation.
- High passive recreational value.
- High aesthetic value.
- In keeping with the landscape of the area.
- Keeps shallow water channels cool.
- Trees absorb noise, screen scenery, and act as wind breaks and shelter beds, moderate air temperatures.
- Can group plants with similar watering needs together to prevent over-watering.
- Maintenance is low once established. First few years need weed suppression, rodent protection and watering.
- Provide shelter and privacy.
- Tourism and local identity, enhances the urban environment.
- Less watering and maintenance costs.

Application

Maintaining areas of natural vegetation

Where natural vegetation communities occur, they should be conserved and maintained as an important resource for vegetation community conservation, fauna habitats, genetic resources, recreation, aesthetics and soil conservation. Most of these communities will have some degree of degradation and may require weeding and rehabilitation, particularly understorey species. This can be achieved by direct seeding of local seed stock or alternatively planting seedlings of local species. Remnant vegetation on roadside areas can be linked to other roadsides, or blocks of bushland making corridors of vegetation. This is particularly important for fauna movement but also provides a good genetic pool for future evolution and adaptation and therefore long term survival of the vegetation community. In rural areas, the vegetation can provide an important windbreak and reduce soil loss. Natural vegetation is also aesthetically pleasing and local species give an area a local identity.

Revegetating cleared areas

If the area has already been cleared of vegetation then revegetating with local species has numerous advantages. Not only is it better for conservation purposes, the local plants will require less maintenance. Cleared areas may include urban blocks, road verges, parklands, pastured land and other rural areas. The cleared site will usually require some weeding and possibly some erosion and soil maintenance. If salt intrusion has occurred it may be necessary to plant salt tolerant species which did not originally occur at the site. A list of salt tolerant Western Australian species is included.

9.0 Plant Species Found on Soil Associations

Steps to planting local species

There are several ways to ensure that the plants used for rehabilitation and replanting are suitable for the chosen site.

- Identify your aims and objectives for the site. Consider your purpose for planting such as rehabilitation, regeneration, salinity control, erosion control, and habitat protection. By doing this you will focus your program and be able to evaluate it.
- Identify the site and its natural environmental conditions. Once a site has been identified for rehabilitation or revegetation, consider the environmental conditions. A quick sketch map of its soil types, groundwater salinity, moisture conditions and slopes will be useful for identifying what species to plant. (A basic map of the soil is shown on Figure 2, however you may wish to check with the Agriculture Department of WA for more detailed information). Identify any remnant vegetation communities, natural features such as rocky outcrops and drainage lines. If replanting a cleared area, such as a roadside verge, consider runoff and soil conditions.
- Identify areas which have specific problems, such as a big weed invasion, erosion, and steep slopes, or which require removal of rubbish. It may be necessary to clean up the site before planting. In an urban environment, it may be necessary to identify areas where large trees are not suitable for due to the closeness of utility infrastructure or buildings.
- Selection of species. The object of replanting cleared areas is to recreate an area of local flora. Plants can be selected from the lists for your soil conditions. Identifying other species from adjoining remnant vegetation communities may also guide your plant selection. At urban sites, it may be wise to select the hardy species from which would have originally grown in that area according to the soil map. In many cases, the land use has dramatically changed the ecology of the environment by erosion and salt encroachment and a plant list of salt tolerant Western Australian plants has been provided.
- Prepare a planting guide using site conditions and taking into consideration the height and spread of the plants and any formal garden patterns you may require in an urban area.
- Preparing stock. Consider whether direct seeding or planting advanced stock is the most suitable for your project. Advanced stock is more suitable for small scale projects as seedlings will require some initial maintenance. One technique is to collect seeds and cuttings, with approval, from adjoining remnant vegetation communities with similar environmental conditions. These seeds and cuttings can be propagated for planting using a number of techniques. Propagation techniques of local species have been well developed and many rehabilitation groups can advise on the most suitable techniques for a particular type. Creating a good plant nursery or a seed bank is one way of ensuring that the plants propagated are suitable for the chosen site. It can also ensure that if the planting program over several years the costs of acquiring plants is reduced and that planting can occur as required.
- Alternatively, there are several plant nurseries which can supply local species and advise on which species to plant. In many cases, large numbers of plants can be ordered, (may need to order well ahead of the planting season) and in some cases help with planting can also be given by volunteers or at a small cost. If ordering from a nursery, it is important to identify which species you require as although a species may be local to south Western Australia, it may not be suitable for your site.
- Timing. Planning when to plant is extremely important for growing success. It is usually best to plant prior to the first winter season rains. This will ensure that the plants have had time to establish prior to the dry summer.
- Site preparation. Most sites will require weeding to ensure that the newly planted seedlings are not competing with weeds. Depending on the weeds present different techniques will be required. Techniques can include a combination of manual, biological and chemical controls and the applications of these techniques will depend on site conditions and the severity of weed infestation. Weed control will be a long term program; however, an initial program of intensive weed control will reduce the number of weeds to be removed after local species have been planted. It is useful to record what techniques have been used for future reference on which techniques work best for your site.

- If direct seeding, the soil will need to be prepared. Large areas should have the top soil with weed, seed stock removed. Alternatively, weed management techniques such as spraying with a carefully chosen fertiliser may be the best option. Plough the soil several times and create furrows at a suitable depth and direction according to the slope and if possible mix the seed with mulch.
- Plant care. Ensure that your plant stock has good root growth and it is disease free and healthy at the time of planting. Transport plants straight from the nursery to the site to reduce double handling and plant stress. Ensure that all plants in pots are watered prior to and immediately after planting to compact the soil around the plants and remove air pockets. Plants should be planted so that water is retained around the plant but is not flooded in the wet season. The hole should be the same size as the pot. The application of mulch will be beneficial to the young plant as it will keep the soil moist and cool. It will also reduce the regrowth of weeds during the early stages.
- Ongoing maintenance. Ensure that all your hard work is not wasted and make sure that your plants receive enough water. Most native plants will survive the summer period without water once established. If it is possible a trickle irrigation system is an easy watering method. One of the benefits of planting local species is that they will not require fertiliser. Most native plants do not grow well if the crown has been pruned. It is best to ensure that the plants are the right size for your site rather than prune.

Considerations for future vegetation care

Because it takes a lot of work to re-establish native flora community, existing plant communities should be well managed. When possible, native flora should be retained. Identification of local species in bushland and riparian locations aids on going maintenance and regeneration programs. Areas of bushland are usually better than several small isolated bushland areas because it is easier to manage and better for flora conservation. If subdividing or clearing, stockpile the topsoil which has valuable seeds and nutrients which can be used when revegetating the subdivision. If clearing, collect seeds and cuttings for propagation. If the land is already cleared, developers and owners should be encouraged to use local flora or their landscaping.

Acacia	cochlearis	Rigid wattle	Shrub	2	Aug-Sep	Direct seeding
Acacia	cyclops	Coastal wattle	Shrub	3	Sep-Jan	Direct seeding
Acacia	pulchella	Prickly moses	Shrub	2	Jun-Oct	Direct seeding
Acacia	saligna	coojong	Shrub	6	Aug-Oct	Direct seeding
Acacia	stenoptera	Narrow-winged wattle	Shrub	1	May-Sep	Direct seeding
Acacia	willdenowiana	Grass wattle	Shrub	0.5	Jun-Oct	Direct seeding
Acacia	xanthina	White-stemmed wattle	Shrub	4	Aug-Oct	Direct seeding
Agonis	flexuosa	Peppermint	Tree	12	Aug-Dec	Direct seeding
Allocasuarina	fraseriana	Sheoak	Tree	12	May-Nov	Direct seeding
Allocasuarina	humilis	Dwarf sheoak	Shrub	1.5	May-Nov	Direct seeding
Andersonia	invoucrata	no common name	Shrub	0.3	Sep-Nov	Plant seedlings
Angiozanthos	humilis	Catspaw	Shrub	0.5	Aug-Oct	Direct seeding
Angiozanthos	manglesii	Mangles kangaroo paw	Shrub	0.5	Sep-Nov	Direct seeding
Arthropodium	capillipes	No common name	Shrub	1	Nov-Mar	Direct seeding
Arthropodium	preissii	Nodding chocolate lilly	Herb	0.5	Sep-Oct	Direct seeding
Astroloma	ciliatum	Candle cranberry	Herb	0.3	Sep-Nov	Direct seeding
Banksia	attenuata	Candle banksia	Tree	8	Sep-Feb	Direct seeding
Banksia	grandis	Bull banksia	Tree	8	Sep-Dec	Direct seeding
Banksia	menziesii	Firewood banksia	Tree	8	Feb-Aug	Direct seeding
Banksia	prionotes	Saw-tooth banksia	Tree	8	Feb-Aug	Direct seeding
Banksia	iberidifolia	Swan River daisy	Herb	0.5	Aug-May	Plant seedlings
Beaufortia	elegans	Elegant beaufortia	Shrub	1	Nov-Feb	Plant seedlings
Billardiera	variifolia	Billardiera	Creepe:	-	Jan-May	Direct seeding
Bossiaea	eriocarpa	Common brown pea	Herb	0.5	Jul-Oct	Direct seeding
Burchardia	umbellata	Milkmaids	Herb	0.5	Aug-Oct	Plant seedlings
Callitris	preissii	Rottnest cypress	Shrub	6	Sep-Oct	Direct seedings
Calothamnus	quadrifidus	One-sided bottlebrush	Shrub	2	Aug-Dec	Direct seeding
Calothamnus	sanguineus	Silky-leaved bloodflower	Shrub	1	Mar-Nov	Direct seeding
Calytrix	fraseri	Pink summer calytrix	Shrub	1.5	Nov-May	Plant seedlings
Chamelaucium	uncinatum	Geraldton wax	Shrub	3	Aug- Nov	Plant seedlings
Clematis	microphylla	Old man's beard	Creepe:	-	Jul-Sep	Plant seedlings
Clematis	pubescens	White clematis	Creeper	-	Jul-Oct	Direct seeding
Conostylis	aculeata	Prickly conostylis	Herb	0.5	Sep-Oct	Direct seeding
Conostylis	candicalts	Grey cottonheads	Herb	0.5	Aug-Sep	Direct seeding
conostylis	setigera	Bristly cottonhead	Herb	0.5	Sep-Oct	Direct seeding
Cryptandra	arbutiflora	Waxy cryptandra	Shrub	1	May-Oct	Plant seedlings
Dampiera	linearis	Common damperia	Shrub	0.5	Jul-Nov	Plant seedlings
Daviesia	divaricata	Marno	Shrub	1	May-Oct	Plant seedlings
Daviesia	triflora	no common name	Shrub	0.5	May-Sep	Direct seeding
Dianella	divaricata	Flax lily	Herb	1	Jun-Aug	Plant seedlings
Diplopeltis	huegelii	no common name	Shrub	1.5	Jul-Nov	Plant seedlings

<i>Nuytsia</i>	<i>floribunda</i>	Christmas tree		8	Nov-Dec	Plant seedlings
<i>Opercularia</i>	<i>echinocephala</i>	Bristly headed stinkweed	Herb	0.1	Aug-Nov	Plant seedlings
<i>Patersonia</i>	<i>occidentalis</i>	Western patersonia	Shrub	0.5	Sept-Dec	Direct seeding
<i>Patersonia</i>	<i>umbrosa</i>	Shade patersonia	Shrub	0.5	Aug-Oct	Direct seeding
<i>Persoonia</i>	<i>Saccata</i>	Snottygobble	Shrub	1.5	Jul-Jan	Plant seedlings
<i>Petrophile</i>	<i>Linearis</i>	Pixie mops	Shrub	0.5	Sep-Nov	Direct seeding
<i>Petrophile</i>	<i>Serruriae</i>	no common name	Shrub	1	Aug-Nov	Direct seeding
<i>Petrophile</i>	<i>squamata</i>	no common name	Shrub	1.5	Aug-Nov	Direct seeding
<i>Phyllanthus</i>	<i>calycinus</i>	False boronia	Shrub	0.3	Jun-Nov	Direct seeding
<i>Sphaerolobium</i>	<i>Medium</i>	Globe pea	Shrub	0.5	Aug-Nov	Direct seeding
<i>Tetrarrhena</i>	<i>Lavis</i>	Forest rice grass	Shrub	0.5	Sep-Nov	Direct seeding
<i>Thysanotus</i>	<i>dichotontus</i>	Branching fringed lily	Shrub	0.5	Sep-Dec	Direct seeding
<i>Thysanotus</i>	<i>manglesiansu</i>	Fringe lily	Climber	-	Aug-Nov	Direct seeding
<i>Thysanotus</i>	<i>multiflorus</i>	Many flowered fringed lily	Shrub	0.5	Sep-Jan	Direct seeding
<i>Trymalium</i>	<i>ledifolium</i>	no common name	Shrub	1	Jul-Oct	Direct seeding
<i>Trymalium</i>	<i>floribundum</i>	Karri hazel	Shrub	3	Aug-Sep	Direct seeding
<i>Verticordia</i>	<i>Acerosa</i>	no common name	Shrub	1	Aug-Nov	Plant seedlings
<i>Verticordia</i>	<i>Plumose</i>	Plumed feather flower	Shrub	1	Sep-Dec	Plant seedlings
<i>Xanthorrhoea</i>	<i>Gracilis</i>	Graceful grass tree	Shrub	1	Oct-Dec	Direct seeding
<i>Xanthorrhoea</i>	<i>Preissii</i>	Grass tree	Shrub	3	Nov-Jan	Direct seeding
<i>Xylomeleum</i>	<i>occidentale</i>	Woody pear	Tree	8	Dec-Feb	Direct seeding

Fringing Estuarine Species						
Scientific Name		Common Name	Form	Height (m)	Flowers	Planting
<i>Agonis</i>	<i>flexuosa</i>	Peppermint	Tree	15	Sep-Dec	Direct seeding
<i>Allocasuarina</i>	<i>fraseriana</i>	Sheoak	Tree	15	May-Oct	Direct seeding
<i>Atriplex</i>	<i>hypoleuca</i>	Saltbush	Shrub	2	Dec-Apr	Direct seeding
<i>Bamea</i>	<i>vaginalis</i>	Sheath twig sedge	Sedge	2.5	Oct-Nov	Plant seedlings
<i>Banksia</i>	<i>littoralis</i>	Swamp banksia	Tree	12	Mar-Jul	Direct seeding
<i>Baumea</i>	<i>juncea</i>	Bare twigrush	Sedge	1.2	Jan-Apr	Plant seedlings
<i>Bolboschoenus</i>	<i>caldwellii</i>	Marsh club rush	Sedge	1.2	Aug-Nov	Direct seeding
<i>Carex</i>	<i>in versa</i>	Knob sedge	Sedge	1.5	Sep-Oct	Direct seeding
<i>Carex</i>	<i>appressa</i>	Tall sedge	Sedge	2	Sep-Oct	Direct seeding
<i>Casuarina</i>	<i>obesa</i>	Swamp sheoak	Tree	15	All year	Direct seeding
<i>Eucalyptus</i>	<i>rudis</i>	Flooded gum	Tree	25	Apr-Nov	Direct seeding
<i>Frankenia</i>	<i>pauciflora</i>	Southern sea heath	Shrub	0.5	All year	Plant seedlings
<i>Gahnia</i>	<i>trifida</i>	Coast saw sedge	Sedge	1	Aug-Oct	Plant seedlings
<i>Haloscarcia</i>	<i>indica</i>	A samphire	Shrub	2	Nov-Apr	Plant seedlings
<i>Haloscarcia</i>	<i>halocnemoides</i>	Shrubby samphire	Shrub	0.3	Nov-Apr	Plant seedlings
<i>Haloscarcia</i>	<i>leptosperma</i>	A samphire	Shrub	1	Mar-Apr	Plant seedlings
<i>Juncus</i>	<i>kraussi</i>	Shore rush	Sedge	1.5	Nov-Dec	Plant seedlings
<i>Melaleuca</i>	<i>cuticularis</i>	Saltwater paperbark	Tree	7	Sep-Dec	Direct seeding
<i>Melaleuca</i>	<i>rhaphiophylla</i>	Swamp paperbark	Tree	10	Sep-Jan	Direct seeding
<i>Melaleuca</i>	<i>thymoides</i>	A myrtle	Tree	2	Sep-Jan	Direct seeding
<i>Melaleuca</i>	<i>vinimea</i>	Mohan	Tree	3	Aug-Oct	Direct seeding
<i>Myporum</i>	<i>caprariodes</i>	Slender myporium	Shrub	2	All year	Plant seedlings
<i>Sarcocornia</i>	<i>blackiana</i>	A samphire	Shrub	1	Oct-Feb	Plant seedlings
<i>Sarcocornia</i>	<i>quinqueflora</i>	Beaded samphire	Shrub	0.5	Nov-Mar	Plant seedlings

9.0 Plant Species Found on Soil Associations

Salt Tolerant Species						
Scientific Name		Common Name	Form	Height (m)	Flowers	Planting
<i>Acacia</i>	<i>Cyclops</i>	Red-eyed wattle	Shrub	3	Sep-Jan	Direct seeding
<i>Acacia</i>	<i>lasiocarpa</i>	Dune mooses	Shrub	1	Jun-Oct	Direct seeding
<i>Acacia</i>	<i>restellifera</i>	Summer-scented wattle	Shrub	2	Aug-Oct	Direct seeding
<i>Acacia</i>	<i>Saligna</i>	Coojong	Shrub	6	Aug-Oct	Direct seeding
<i>Atriplex</i>	<i>Cinerea</i>	Berry salt bush	Shrub	1	Sep-Oct	Direct seeding
<i>Atriplex</i>	<i>Insatidea</i>	Coast salt bush	Shrub	2	Mar-Jun	Direct seeding
<i>Casuarina</i>	<i>Obese</i>	Swamp sheoak	Tree	10	May-Oct	Direct seeding
<i>Eucalyptus</i>	<i>angustissima</i>	Mallee	Tree	8	December	Direct seeding
<i>Eucalyptus</i>	<i>astringens</i>	Brown mallee	Tree	15	Oct-Nov	Direct seeding
<i>Eucalyptus</i>	<i>campaspe</i>	Silver-topped gimlet	Tree	10	Nov-Jan	Direct seeding
<i>Eucalyptus</i>	<i>kondininensis</i>	Kondinin blackbutt	Tree	25	Oct-Nov	Direct seeding
<i>Eucalyptus</i>	<i>occidentalis</i>	Flat-topped yate	Tree	20	Nov-Dec	Direct seeding
<i>Eucalyptus</i>	<i>Platypus</i>	Moort	Tree	6	Jun-Jan	Direct seeding
<i>Eucalyptus</i>	<i>Rudis</i>	Flooded gum	Tree	15	Apr-Nov	Direct seeding
<i>Eucalyptus</i>	<i>Salubris</i>	Gimlet	Tree	25	Oct-Jan	Direct seeding
<i>Eucalyptus</i>	<i>Sargentii</i>	Salt-river gum	Tree	8	Sep-Nov	Direct seeding
<i>Frankenia</i>	<i>pauciflora</i>	Seaheath	Shrub	0.5	all year	Direct seeding
<i>Halosarcia</i>	<i>halocnemoides</i>	Shrubby samphire	Shrub	0.5	Nov-Apr	Plant seedlings
<i>Halosarcia</i>	<i>Indica</i>	Samphire	Shrub	2	Nov-Apr	Plant seedlings
<i>Melaleuca</i>	<i>cuticularis</i>	Saltwater paperbark	Tree	7	Sep-Nov	Direct seeding
<i>Nitraria</i>	<i>billardiarei</i>	Nitre bush	Shrub	2	Sep-Nov	Direct seeding
<i>Threlkeldia</i>	<i>Diffusa</i>	no common name	Shrub	0.3	Aug-Jan	Plant seedlings
Note: Not all these species are indigenous to the Swan River System and should only be planted when salt problems are severe.						

Common Weed Species					
Scientific Name		Common Name	Form	Height (m)	Flowers
* <i>Acanthocarpus</i>	<i>preissii</i>	Prickly lily	Herb	1	Apr-Aug
* <i>Arctotheca</i>	<i>calenula</i>	Capeweed	Herb	0.3	Jul-Oct
* <i>Arundo</i>	<i>donax</i>	Giant reed	Grass	3	Apr-Jun
* <i>Ascepias</i>	<i>curassavica</i>	Redhead cottonbush	Herb	1	Mar-Jun
* <i>Atriplex</i>	<i>prostrata</i>	no common name	Shrub	1	Dec-May
* <i>Avena</i>	<i>fatua</i>	Wild oats	Grass	0.5	Aug-Dec
* <i>Avena</i>	<i>barbata</i>	Bearded oat	Grass	1	Aug-Oct
* <i>Bambusa</i>	<i>sp</i>	Bamboo	Grass	3	-
* <i>Brachychiton</i>	<i>acerifolius</i>	Flame trees	Tree	30	Nov-Feb
* <i>Briza</i>	<i>maxima</i>	Blowfly grass	Grass	0.5	Sep-Oct
* <i>Briza</i>	<i>minor</i>	Quaking grass	Grass	0.5	Sep-Nov
* <i>Canna</i>	<i>x orchiodes</i>	Canna lily	Herb	2.5	Nov-Mar
* <i>Carpobrotus</i>	<i>edulis</i>	Pigface	Herb	0.3	Aug-Oct
* <i>Cassytha</i>	<i>sp</i>	Golden dodder	Twiner	-	-
* <i>Casuarina</i>	<i>glauca</i>	Swamp oak	Tree	15	Sep-Oct
* <i>Chenopodium</i>	<i>glaucum</i>	Glaucous goosefoot	Herb	0.5	Mar-Jun
* <i>Cortaderia</i>	<i>selloana</i>	Pampas grass	Grass	3	Jun-Sep
* <i>Cynodon</i>	<i>dactylon</i>	Couch	Grass	0.2	Oct-Nov
* <i>Cyperus</i>	<i>sp</i>	Sedge nutgrass	Sedge	1	
* <i>Dipogon</i>	<i>lignosus</i>	Dolichos pea	Twiner	-	Sep-Nov
* <i>Echium</i>	<i>plantagineum</i>	Paterson's curse	Herb	1	Sep-Nov
* <i>Ehrharta</i>	<i>calycina</i>	Perennial veldtgrass	Grass	0.5	Apr-Sep
* <i>Eragrostis</i>	<i>curvula</i>	African lovegrass	Grass	1	Dec-May
* <i>Eritryoma</i>	<i>caffra</i>	Coral tree	Tree	20	
* <i>Eucalyptus</i>	<i>camaldulensis</i>	River red gum	Tree	50	Jun-Oct
* <i>Eucalyptus</i>	<i>citriodora</i>	Lemon scented gum	Tree	40	Jun-Oct
* <i>Eucalyptus</i>	<i>cladocalyx</i>	Sugargum	Tree	20	Nov-Feb
* <i>Ficus</i>	<i>caraca</i>	Fig	Tree	10	Aug-Nov
* <i>Foeniculum</i>	<i>vulgare</i>	Fennel	Herb	2.5	Jul-Jan
* <i>Gladiolus</i>	<i>angustatus</i>	Long tubed painted la	dy Herb	0.6	Oct-Nov
* <i>Gladiolus</i>	<i>caryophyllaceus</i>	Gladiolus	Herb	0.8	Aug-Oct
* <i>Gomphocarpus</i>	<i>fruticosus</i>	Cottonbush	Shrub	1	Nov-Apr
* <i>Hastate</i>	<i>orache</i>		Shrub	1	Dec-May
* <i>Helianthus</i>	<i>annuus</i>	Sunflowers	Herb	3	Feb-May
* <i>Homeria</i>	<i>breyntiana</i>	Cape tulip	Herb	0.7	Sep-Nov
* <i>Homeria</i>	<i>flaccida</i>	One leafed cape tulip	Herb	0.7	Sep-Nov
* <i>Ipomoea</i>	<i>indica</i>	Morning glory	Twiner	-	Nov-Apr
* <i>Jacaranda</i>	<i>minosifolia</i>	Jacaranda	Tree	10	Nov-Feb
* <i>Lagurus</i>	<i>ovatus</i>	Cats tails	Herb	0.2	Aug-Dec
* <i>Lantana</i>	<i>camara</i>	Lantana	Shrub	3	Jun-Aug
* <i>Leptospermum</i>	<i>laevigatum</i>	Victorian tea-tree	Shrub	3	Sep-Oct
* <i>Lobularia</i>	<i>maritima</i>	Sweet alyssum	Herb	0.2	Sep-Oct
* <i>Lolium</i>	<i>perenne</i>	Rye grass	Grass	0.5	Sep-Dec
